

PROFESSIONAL SUMMARY

Software engineer with a Master's in Computer Science and 1+ year of industry experience building production-grade applications across the full stack. Experienced in delivering real-time, data-driven, and AI-powered systems including multi-screen enterprise dashboards, interactive 3D web experiences, and LLM-integrated desktop applications. Comfortable taking ownership of end-to-end product development, cloud deployment, and performance optimization in fast-paced environments.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, Java, PHP, C	Frontend:	React, Next.js, Svelte, Vite, Tailwind CSS, HTML5
3D and Graphics:	Three.js, React Three Fiber, WebGL, Particle Systems, GSAP	Desktop:	Electron, IPC, NSIS, DMG packaging, multi-window systems
Backend and APIs:	Node.js, Express.js, REST APIs, Socket.IO, WebSocket, STOMP	AI and ML:	LLM integration (Gemini, OpenAI, Anthropic), RAG, MediaPipe, TensorFlow, PyTorch, Scikit-Learn, Whisper, Sherpa-ONNX
Databases:	MongoDB, MySQL, PostgreSQL, Elasticsearch	Cloud and DevOps:	AWS, Azure, Aliyun OSS, Docker, Vercel, Heroku, SSL management
Testing and QA:	Vitest, Cypress, Selenium, Postman, ESLint, Prettier	Tools:	Git, Docker, Figma, Adobe XD, Jira, Linux, Android Studio, Xcode

WORK EXPERIENCE

Cross-Platform Web and Software Engineer

Sencity Corp., Shenzhen, China

- Architected and shipped multi-screen enterprise dashboard systems using Electron with IPC and Socket.IO, controlling 6+ simultaneous display outputs in real-time for large-scale events.
- Built interactive 3D web experiences with Three.js and React Three Fiber, including particle physics engines with 12,000+ particles, custom WebGL shaders, HDR environments, and ACES tone mapping.
- Integrated real-time hand gesture recognition using MediaPipe with a custom particle rendering pipeline for a live interactive installation.
- Developed a cross-platform desktop application with LLM and speech recognition integration (Whisper, Sherpa-ONNX), STOMP protocol control layer, and automated multi-window state management.
- Delivered multiple production-grade React, Next.js, and Tailwind web platforms including SSR data portals, 3D model showrooms, and AI-powered interfaces connected to Gemini and OpenAI APIs.
- Implemented cross-platform packaging (NSIS, DMG), Docker containerization, and Aliyun OSS cloud storage for scalable asset delivery.
- Worked extensively with an interactive kiosk and digital signage platform built on Node.js and TypeScript, implementing event-driven synchronization across distributed multi-screen installations. Integrated STOMP over WebSocket and

May 2025 - Present

Socket.IO for real-time device orchestration, built playlist scheduling logic for trigger-based and timed content delivery, and developed platform-agnostic system control layers (brightness, volume, sensor input) targeting Linux, Windows, and macOS deployments.

Frontend Developer Intern
Sencity Corp., Shenzhen, China

Nov 2024 - Mar 2025

- Contributed to front-end development and UniApp debugging across multiple web and mobile projects.
- Managed production web deployments including server configuration, SSL certificate provisioning, and backend log monitoring for performance troubleshooting.
- Built a standalone AI photo booth application with HTML and JavaScript frontend and PHP-based API integrations.

EDUCATION

Master of Science in Computer Science
Harbin Institute of Technology GPA: 90.6 / 100.0

Sep 2022 - Jan 2025

Bachelor of Science in Software Engineering
Jinnah University for Women CGPA: 3.84 / 4.00

Jan 2018 - Dec 2021

AWARDS AND SCHOLARSHIPS

- Chinese Government Scholarship** - Fully-funded Master's degree, 2022 to 2025
- Merit-Based Full Semester Scholarship** - Bachelor's 3rd Year, 2020
- Best Undergraduate Project Award** - Pakistan Center for IoT, 2022
- Women in Computing, Java Q&A Winner** - Jinnah University for Women, 2019

LANGUAGES

English - Fluent | Urdu / Hindi - Native | Chinese (Mandarin) - Basic
